The POSmill CE 1000 is equipped with a Heidenhain TNC 640 as standard and offers travels of 1,000 x 600 x 600 mm (X,Y,Z), with a power of 38 kW at 12,000 min<sup>-1</sup>. Due to the pyramid design, the machine has a large mass in the lower area to be able to safely absorb all forces that occur. In the upper area, the machine column is tapered to provide the necessary dynamics. Six large, centrally lubricated guide shoes provide ideal conditions for maximum geometric accuracy and best force absorption. This absorbs vibrations and resonances and leads to greatly improved tool life. POS uses a total of 14 centrally lubricated guide shoes across all axes.

Thus, all occurring machining forces are absorbed with a high reserve. The carrier elements in the guide shoes themselves are not only designed as balls, but as high-quality rollers, so that force transmission takes place at the highest level.
