The WERT VideoCheck-IP has been regularly maintained, including software and sensor head.

Optical measuring device in modular design for non-contact measurement, equipped with three independent infinitely variable illumination modes and fitted with a telecentric measuring lens.

Constant voltage controller for highest accuracy and long-term stability in the production and measuring room

Controller Movement X and Y is generated by magnetic force and gravity. Voltage changes due to expansion are thus avoided by reducing friction and backlash, resulting in very high long-term stability. Applications are e.g. in the tool and machine building, automotive, electrical, pharmaceutical, plastics, rubber or glass industries.
